## SUMMARY

Computer Science (Co-op) student at Ontario Tech University (expected 2028) with hands-on experience using Python and C++ to build ML prototypes, automation tools, and web applications.

Built and shipped ML/automation projects; co-founded a business supporting \$15K+ annual revenue.

## EDUCATION

**B.Sc. Computer Science w/ Math Minor (Co-op)** 2023 – 2028 (expected)  
*Ontario Tech University* Oshawa, ON

**General Arts & Science** 2022  
*Sheridan College* Ontario, Canada

## TECHNICAL SKILLS

**Languages:** Python, C++, Java, JavaScript, SQL, HTML/CSS

**Frameworks / Tools:** PyTorch, Node.js, Docker, Flask, SQLAlchemy, SQLite, Git, GitHub, Google Analytics

**Concepts:** REST APIs, data analysis & reporting, web accessibility, web application design

**Spoken Languages:** English; Pashto; Dari (Persian); Urdu

## PROJECTS

**Deed Finance (AI prototype)** | *Python, Flask, SQL* 2025  
• AI-assisted rewards optimizer; integrates LLM APIs to analyze points and surface transaction-level insights.

**CookGPT** | *PyTorch, PYthon, Web Scraping, REST APIs* 2025  
• Built an LLM-powered conversational system for recipe discovery and food-related Q&A using PyTorch pipelines.  
• Scraped and cleaned a dataset of 500+ cuisines/recipes; exposed retrieval via REST endpoints.

**Credit Card Fraud Detection Model** | *Python, Pandas, Numpy, PyTorch* 2025  
• Built and evaluated machine learning models to detect fraudulent transactions from imbalanced financial datasets.

## EXPERIENCE

**Digital Services Intern** Jul 2025 – Sep 2025  
*OCASI (Ontario Council of Agencies Serving Immigrants)* Toronto / Hybrid  
• Audited website structure and front-end content (HTML/CSS) to improve accessibility and usability.  
• Analyzed traffic patterns for sites with 6M+ annual visits using Google Analytics; delivered insights to the Head of Technology.  
• Standardized reporting templates, improving readability and reducing review time.

**Founder & Operator, Deed Leisure (custom merchandise)** 2023 – Present  
*Oshawa, ON*  
• Founded and operate an online custom-merchandise business (team of 3), leading fulfillment and customer communication.  
• Built lightweight order-tracking workflows (spreadsheets/scripts), supporting \$15,000+ annual revenue.

**Team Member, OTOPs Rover (Rocketry Team)** Oct 2025 – Present  
*Guidance, Software & Navigation Team* Ontario Tech University  
• Contribute to guidance/navigation software (Python/C++), supporting sensor integration and system testing.

**Crew Trainer / Team Member** 2022 – Present  
*McDonald's* Oshawa, ON  
• Train new staff on POS and drive-thru operations; support shift leads to sustain service quality during peaks.
